Speech bubbles

INSTRUCTIONS

It's time to write your own story! This template has all the elements to help you get started.

To build scenes, go to a resource page and select an element. Use the right-click options to copy from there and paste on your chosen page.

Play around with your elements by exploring the position options. Select the element, click the Position button found on the upper right corner of the editor, and select Forward or Backward.

Add characters and speech bubbles, writing text as you go to build your story. Once you're done designing and writing, delete the instructional texts, and the resource and how-to pages.

Click the Preview button to flip through and review the pages. After that, your book is ready to print, share, or download.

Happy writing!
